

## Lighting for Tiger Boom Mowers

### Be Safe, Be Seen!!

Due to recent revisions in the lighting regulation on agricultural equipment by the National Highway Traffic Safety Administration, Tiger has added lights as standard equipment on all products that have tractor lights obstructed by their mowers in stow positions.

This implementation will assure safety to not only the equipment operators, but also the general public that are approaching from the rear.

Tiger has kits available to retrofit any existing equipment you have in your fleet. You can review the complete revision in the Federal Register, Department of Transportation, 49 CFR Part 562.

Tiger 10S Stow lightbar

Tiger 30S Stow lightbar

Tiger Bengal Brute Stow rear lights

Tiger Wildkat Stow rear lights
